

HELP US FOLLOW OUR ECO CODE:

Everyone is responsible for our environment, so take action and be a part of our 'Eco Schools' team!

Control your use of energy – don't waste it! Remember to turn off lights/projectors/computers when they are not needed, close windows, check for dripping taps and don't waste water.

Once a week could you walk/scoot/ride to school? Leave the car at home and reduce congestion on our roads and pollution in the air.

Can you recycle any waste paper, cardboard, plastic bottles and tins into your class's green recycling bin?

Outside and in the playground put your litter in the bin and pick up any litter you see to help keep our school clean and tidy.

Do consider how we care for nature; our flowers, plants, trees, insects, birds and animals need us, and we need them.

Each of us must remember to **Reduce-Reuse-Recycle-Respect** in order to help save our environment and make our world a better place!
